---

## SUMMARY

Full Stack Developer with hands-on experience building modern web applications using React, Node.js, and TypeScript. Proficient in developing scalable applications with features like real-time communication, authentication systems, and database management. Currently contributing to production projects while continuously expanding technical expertise. Strong problem-solver with attention to detail and passion for clean, maintainable code.

---

## TECHNICAL SKILLS

**Frontend:** React.js, Next.js, HTML, CSS, JavaScript, TypeScript, Tailwind

**Backend:** Node.js, Express.js, Sequelize, Mongoose

**Database:** MySQL, MongoDB

**State Management:** Redux, Zustand

**Authentication:** JWT, Clerk

**Tools & Platforms:** Git/GitHub, Socket.io, Cloudinary, AWS (S3), Postman, WordPress CMS

---

## EXPERIENCE

**Junior Developer** | Recurziv, Panaji Goa

*Nov 2024 — Present*

- Developing frontend features for a production React-based inventory management application serving active clients
  - Building custom WordPress solutions including dynamic content blocks, media management systems, and custom post types for enterprise clients
  - Implementing responsive, cross-browser compatible UI components using modern React patterns and best practices
  - Collaborating in an agile development environment with daily standups, sprint planning, and peer code reviews
  - Contributing to technical decision-making for component architecture and state management strategies
  - Working directly with senior developers to optimize application performance and maintain code quality standards.
- 

## PROJECTS

## Circle — Group Chat Application

 [github.com/Shresthikashyap/Circle](https://github.com/Shresthikashyap/Circle)

**Tech:** React, Node.js, MySQL, Sequelize, Socket.io, Cloudinary, Gemini API

Real-time group chat application featuring AI-powered conversational responses. Includes user authentication with JWT, media sharing via Cloudinary, and persistent chat history stored in MySQL database.

## Expensify — Expense Tracker

 [github.com/Shresthikashyap/Expensify](https://github.com/Shresthikashyap/Expensify)

**Tech:** React, Redux, Node.js, Express, MongoDB, Mongoose, JWT

Personal finance management application with expense categorization, budget tracking, and visual spending analytics. Features secure authentication and robust backend APIs for reliable expense tracking across devices.

## TechMart — E-Commerce Platform

 [github.com/Shresthikashyap/TechMart](https://github.com/Shresthikashyap/TechMart)

**Tech:** Next.js, TypeScript, Prisma, MySQL, Zustand, Tailwind, JWT

Full-featured e-commerce platform with product catalog management, shopping cart functionality, secure user authentication, and comprehensive order management system.

## Vibify — Music Streaming App

 [github.com/Shresthikashyap/Vibify](https://github.com/Shresthikashyap/Vibify)

**Tech:** React, TypeScript, Node.js, MongoDB, Mongoose, Zustand, Clerk, Cloudinary

Music streaming platform with playlist creation, audio playback controls, user profile management, and admin dashboard for content management and analytics.
